EDUCATION

Guru Gobind Singh Indraprastha University (GGSIPU)

Delhi, India

Bachelor of Technology in Artificial Intelligence & Machine Learning

Expected May 2026

- **GPA:** 8.8 / 10
- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Computer Networks
- **Mathematical Foundations:** Linear Algebra, Probability & Statistics, Discrete Mathematics

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL

Frontend: Next.js, React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs

Databases: MongoDB

AI/ML: Scikit-learn, Pandas, NumPy, TensorFlow

Generative AI: Prompt Engineering, LLM Integration, Groq API, Gemini API

Developer Tools: Git, GitHub, Postman, Docker, Vercel, Render

PROJECTS

StudiQo | *AI Productivity Platform* | [GitHub](#) | [Live](#)

- Architected a production-grade full-stack AI study platform using **Next.js** across **3+ core modules**, with **OAuth + Better Auth** social login and session management enabling seamless access for **100+ users**
- Integrated **LLM APIs (Groq, Gemini)** to deliver AI-generated study plans and context-aware task suggestions, cutting manual planning time by an estimated **60%** per session
- Deployed on **Vercel** with **Next.js** SSR and static generation, achieving sub-2-second load times across **5+ page routes** with a fully responsive **Tailwind CSS** UI

SpendFlux | *Personal Finance Tracker* | [GitHub](#) | [Live](#)

- Built a full-stack finance app with **8+ RESTful API endpoints** using **Node.js**, **Express.js**, and **MongoDB**, handling **1,000+ monthly transactions** with sub-500ms response times
- Embedded **AI-powered spending insights** via **Groq API** and interactive bar/pie chart visualizations, helping users reduce unnecessary expenses by an estimated **20%**
- Engineered a responsive **React.js + Tailwind CSS** frontend with **10+ reusable components** for seamless cross-device usability and optimized async state management

TestMaker | *AI Question Generator* | [GitHub](#) | [Live](#)

- Developed an AI-powered PDF-to-exam pipeline using **Groq API** and **LLM inference**, generating **10–30 structured questions per document** in under **15 seconds** across **25+ documents**
- Architected a clean, decoupled full-stack system with a **Flask** REST backend handling PDF ingestion and LLM orchestration, paired with an intuitive **React.js** frontend for seamless document upload and question export
- Applied advanced **prompt engineering** — structured output formatting and chain-of-thought parsing — achieving **90%+ relevance accuracy** and reducing manual effort by an estimated **75%**

RESEARCH & PUBLICATIONS

Intelligent Fashion Recommender System: Redefining Style with Deep Learning

Published Research Paper | DOI: [10.21467/proceedings.178.1](https://doi.org/10.21467/proceedings.178.1)

- Designed a deep learning recommendation model using **neural networks** and **feature embeddings**, improving accuracy by **18%** over baseline; applied **computer vision** and **NLP** to extract attributes across **10,000+ item embeddings**
