# ANUJ NEGI

anujn158@gmail.com • +918595762918 • LinkedIn| AnujNegi • Github|AnujNegi

## EDUCATION

**B.Tech in Artificial Intelligence & Machine Learning** | GGSIPU, Delhi | **Expected Graduation: 05/2026**
*Cumulative GPA: **8.8** / 10*

- **Relevant Coursework:** *Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Computer Networks*
- **Mathematical Foundations:** *Linear Algebra, Probability & Statistics, Discrete Mathematics*

## SKILLS

**Languages, Frameworks & Databases:** Python, C++, JavaScript, HTML, CSS, SQL, React.js, Node.js, Express.js, Flask, FastAPI, MongoDB
**AI, ML & Data Science:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, TensorFlow
**Generative AI & LLM Technologies:** Generative AI & LLM Concepts, AI Tool Proficiency, Prompt Engineering, Gemini, Groq
**Tools & Development:** Git, GitHub, Postman, Docker, Vercel, Render, Jupyter Notebook

## PROJECTS

**SpendFlux — GitHub | Live**

- Built a full-stack personal finance management application to track income, expenses, and budgets with real-time updates
- Developed **REST APIs** using **Node.js** and **Express** with **MongoDB** for efficient data storage and retrieval
- Implemented interactive data visualizations **(bar and pie charts)** and **AI insights using Groq API** for smarter spending analysis
- Designed a responsive **UI** using **React** and **Tailwind CSS** for seamless cross-device usability
- Optimized **state management** and **API handling** to ensure smooth user experience

**BeYourTrainer — GitHub | Live**

- Developed a machine learning-based recommendation system generating personalized **workout plans** based on user goals and inputs
- Preprocessed and analyzed a **4,000+ row dataset** with **feature engineering** to improve recommendation accuracy
- Implemented recommendation logic using **similarity scoring** and **feature-based filtering**
- Built and integrated **Flask REST APIs** with **React frontend** for real-time predictions

**TestMaker — GitHub | Live**

- Built an **AI-powered system** to generate structured exam questions from **PDFs** using **Groq API**
- Processed **25+ documents (up to 40 pages)**, reducing manual effort and improving efficiency
- Applied **prompt engineering** and **structured parsing** to enhance quality and relevance of generated content
- Developed **full-stack architecture** using **Flask backend** and **React frontend**

## RESEARCH & PUBLICATIONS

***Intelligent Fashion Recommender System: Redefining Style with Deep Learning***

- Published research paper on **deep learning-based recommendation systems**
- Utilized **neural networks** and **feature embeddings** to improve recommendation accuracy
- DOI: 10.21467/proceedings.178.1
