EDUCATION

B.Tech in Artificial Intelligence & Machine Learning | GGSIPU, Delhi | **Expected Graduation: 05/2026**

Cumulative GPA: 8.8 / 10

- **Relevant Coursework:** *Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Computer Networks*
- **Mathematical Foundations:** *Linear Algebra, Probability & Statistics, Discrete Mathematics*

SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL

Frontend: Next.js, React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs

Databases: MongoDB

AI/ML: Scikit-learn, Pandas, NumPy, TensorFlow

GenAI: Prompt Engineering, LLM Integration, Groq API, Gemini

Tools: Git, GitHub, Postman, Docker, Vercel, Render

PROJECTS

Studiqo — AI Productivity Platform | [GitHub](#) | [Live](#)

- **Developed** a full-stack **productivity and study management platform** using Next.js
- **Implemented secure authentication** (social login + session handling) for user management
- **Designed a time-based task planner** to streamline daily scheduling
- **Integrated AI-powered task generation** and study assistance using LLM APIs
- **Built a responsive UI** with Tailwind CSS for seamless cross-device usability
- **Deployed a production-ready application** with optimized performance and scalability

SpendFlux — Personal Finance Tracker | [GitHub](#) | [Live](#)

- Built a full-stack personal finance management application to track income, expenses, and budgets with real-time updates
- Developed **REST APIs** using **Node.js** and **Express** with **MongoDB** for efficient data storage and retrieval
- Implemented interactive data visualizations (**bar and pie charts**) and **AI insights using Groq API** for smarter spending analysis
- Designed a responsive **UI** using **React** and **Tailwind CSS** for seamless cross-device usability
- Optimized **state management** and **API handling** to ensure smooth user experience

TestMaker — AI Question Generator | [GitHub](#) | [Live](#)

- Built an **AI-powered system** to generate structured exam questions from **PDFs** using **Groq API**
- Processed **25+ documents (up to 40 pages)**, reducing manual effort and improving efficiency
- Applied **prompt engineering** and **structured parsing** to enhance quality and relevance of generated content
- Developed **full-stack architecture** using **Flask backend** and **React frontend**

RESEARCH & PUBLICATIONS

Intelligent Fashion Recommender System: Redefining Style with Deep Learning

- Published research paper on **deep learning-based recommendation systems**
- Utilized **neural networks** and **feature embeddings** to improve recommendation accuracy
- [DOI: 10.21467/proceedings.178.1](#)
